

PRISMATIC · PRESENTER TALKING POINTS

AWS x MLU FALL SYMPOSIUM 2026

STARTUP: PRISMATIC · TRACK: SCENARIO 2 (STUDY BUDDY) · FORMAT: EXACTLY 2 MINUTES (120 SECONDS)
DELIVERY: NO LIVE CODE DEMO REQUIRED · SHOW RUNNING AMAZON QUICK UI · ROOM WINNER ADVANCES TO MAIN STAGE

1. TIMED 2-MINUTE WORD-BY-WORD PITCH SCRIPT

VERBATIM OFFICIAL HANDOUT CALIBRATION

SEGMENT 1: TEAM NAME · Presenter: Speaker 1 (High Energy, Strong Smile)

0:00 - 0:10 (10s)

"Good afternoon, judges and fellow builders! We are **PRISMATIC**—and we are here to refract the way college students learn!"

SEGMENT 2: THE HOOK · Presenter: Speaker 1 (Relatable, Empathetic, Direct Eye Contact)

0:10 - 0:35 (25s)

"It's 2:00 AM before midterms. You've re-read the exact same textbook paragraph six times—and understood it zero times. [Micro-pause] You turn to ChatGPT in desperation, and it dumps an 800-word wall of text that makes your brain freeze even harder. That sinking panic isn't a lack of intelligence—it's a failure of wavelength. White light holds every color, but professors lecture in one flat shade. Human brains don't think in monochrome—we learn in spectrums."

SEGMENT 3: YOUR APP OVERVIEW · Presenter: Speaker 2 (Product Lead, Gestures to Screen)

0:35 - 1:20 (45s)

"We built **Prismatic** on Amazon Quick—an agentic cognitive engine that turns 1 static lecture into 4 tailored learning modalities in under 30 seconds. First, a rapid 5-question diagnostic maps how your brain absorbs information. Then, our Amazon Bedrock pipeline instantly refracts the material:

- **Spectrum 1** translates abstract theory into relatable dorm and dining hall analogies.
- **Spectrum 2** renders structural ASCII concept maps and visual schemas.
- **Spectrum 3** launches a Socratic Sparring Partner that quizzes you one edge-case at a time without spoiling answers.
- And **Spectrum 4** builds a 4-slide micro-deck exposing the exact trap questions professors test on midterms."

SEGMENT 4: WHY IT WINS · Presenter: Speaker 3 (Market Lead, Confident & Authoritative)

1:20 - 1:45 (25s)

"Over 20 million college students face academic paralysis every semester. Generic tools like ChatGPT just dump 800-word walls of text that students glaze over. Private tutoring costs \$80 an hour, and professor office hours are only 2 hours a week. Prismatic is active, multi-modal, and adapts the syllabus to the student—democratizing elite private tutoring for pennies on Bedrock."

SEGMENT 5: THE CLOSE · Presenter: Speaker 1 & Full Team in Unison

1:45 - 2:00 (15s)

"With more time, we'd add **live Canvas and syllabus LMS integration**, automatically syncing weekly exam dates and generating proactive 15-minute micro-sprints before every morning class. We don't just help students pass exams; we eliminate academic paralysis and unlock confidence. We are **PRISMATIC**—refracting complex knowledge into your native spectrum. Vote Prismatic for your room champion! Thank you!"

2. EMERGENCY QUICK PIVOTS

FAIL-SAFE DRILLS

⚡ 60-Second Flash Pitch (If Time Compressed)

"Judges, it's 2:00 AM before midterms, and 20 million students are freezing over dense course material. Generic AI dumps sterile text; private tutors cost \$80 an hour. That panic isn't a lack of intelligence—it's a failure of wavelength. We built Prismatic on Amazon Quick: a 30-second diagnostic maps your intake profile and refracts any syllabus topic into 4 active modalities: dorm analogies, visual flowcharts, Socratic active recall, and midterm exam trap decks. We give every student an elite, adaptive tutor on Bedrock. With more time, we'd add Canvas LMS integration. We are Prismatic—vote Prismatic!"

🎯 30-Second Speed-Dating Hook & Fallback

"Ever re-read an exam slide six times and understood it zero times? Classrooms broadcast in monochrome, but our brains learn in spectrums. Prismatic is an agentic learning engine on Amazon Quick that refracts dense coursework into 4 active spectrums: analogies, visual schematics, Socratic sparring, and midterm trap cards. We democratize \$80/hour tutoring for every undergrad on campus!"
Tech Fallback: Pivot instantly to the offline local web app (web-app/index.html) which runs with zero Wi-Fi dependencies.

Role #	Dedicated Title	Live Presentation & Judging Responsibility
Member 1	Founding Anchor	Delivers Segments 1 & 2 (Team Intro & 300-Student Hook), leads team energy, coordinates closing call.
Member 2	Product Architect	Delivers Segment 3 (App Overview), gestures smoothly to Amazon Quick screen and live 4 spectrums.
Member 3	Market & Growth Lead	Delivers Segment 4 (Why It Wins), fields market size (\$80/hr tutoring gap) and competitive moats.
Member 4	Display Pilot	Holds laptop/cart steadily displaying running Amazon Quick UI or the local offline Prismatic Web App.
Member 5	Cognitive Pedagogy Lead	Answers Shark Q&A on learning styles, cognitive friction points, and the 5-question diagnostic triage.
Member 6	Cloud Architect	Answers Shark Q&A on Amazon Quick, Amazon Bedrock foundation models, prompt pipelines, and latency.
Member 7	Student Experience Lead	Answers Shark Q&A on 2026 college student reality, dorm life constraints, dining halls, and ADHD study habits.
Member 8	Campus Integration Lead	Answers Shark Q&A on Canvas/Blackboard LMS API sync, course reserves, and university licensing models.
Member 9	Official Room Voter	Designated team representative holding the official ballot for your room (strategic peer voting).
Member 10	Timekeeper & Co-Founder	Gives silent hand gestures at 1:00, 1:30, and 1:45 to guarantee pitch finishes at exactly 1m 52s.

4. ANTICIPATED SHARK TANK Q&A DEFENSE

SHARP REBUTTALS

Q1: "How does this differ from typing 'explain this to me' into ChatGPT?"

Defense: "ChatGPT is passive text generation: it dumps 800 words that cause immediate student glaze. Prismatic is an agentic multi-widget pipeline. It starts with a 30-second diagnostic triage, and orchestrates 4 distinct modalities simultaneously—including a Socratic Sparring Partner that refuses to lecture and instead forces active recall by testing edge cases."

Q3: "How do you prevent students from using this to cheat?"

Defense: "Prismatic is engineered for learning retention, not answer generation. The Socratic module bounds answers to 2 sentences and asks conceptual 'why' questions. It cannot write essays; it trains students to master the underlying mechanics so they can perform on in-person exams."

Q2: "Why did you use Amazon Quick instead of coding a frontend from scratch?"

Defense: "Velocity and multi-model orchestration. In a 75-minute sprint, coding full-stack auth, state management, and Bedrock API calls would introduce latency and bugs. Amazon Quick's Apps mode allowed our 10-person team to chain inputs into text generation, image generation, and a chatbot on a single screen without touching boilerplate."

Q4: "What is your revenue and distribution model?"

Defense: "B2B university licensing (enterprise campus software) integrated into Canvas, plus a freemium B2C tier for students. Universities currently spend millions on retention programs; Prismatic directly increases course completion rates."

5. WHAT THE SHARKS LOOK FOR: FINAL AUDIT

100% COMPLIANCE

Cognitive

✓ **Creativity:** refraction metaphor

✓ **Usefulness:** Solves dorm paralysis & exam panic

✓ **Execution:** Working 6-widget Quick pipeline

✓ **Teamwork:** 10 members with active roles

✓ **Timing:** Exactly 1m 52s (8s buffer)
