

PRISMATIC: 2-MINUTE SHARK TANK PITCH SCRIPT & PLAYBOOK

STARTUP: PRISMATIC · TRACK: SCENARIO 2 (STUDY BUDDY) · FORMAT: EXACTLY 2 MINUTES (120 SECONDS)
RULE: NO LIVE CODE DEMO REQUIRED · SHOW RUNNING AMAZON QUICK UI · ROOM CHAMPION ADVANCES TO FINALS

1. TIMED 2-MINUTE WORD-BY-WORD PITCH SCRIPT (THE 5 OFFICIAL SEGMENTS)

SEGMENT 1: TEAM NAME [0:00 - 0:10 10 SECONDS] · Presenter: Speaker 1 (High Energy)
"Good afternoon, judges and fellow builders! We are PRISMATIC—and we are here to refract the way college students learn!"
SEGMENT 2: THE HOOK [0:10 - 0:35 25 SECONDS] · Presenter: Speaker 1 (Relatable & Empathic)
"Picture a 300-person lecture hall right here at Howard or UMD. The professor spends 75 minutes covering one complex concept. Half the class nods; the other half walks out completely lost with intense brain fog. The problem isn't student intellect. White light contains every color, but a flat chalkboard only projects one shade. Professors teach in one rigid format, while human brains process knowledge in completely different spectrums."
SEGMENT 3: YOUR APP OVERVIEW [0:35 - 1:20 45 SECONDS] · Presenter: Speaker 2 (Product Lead)
"We built Prismatic on Amazon Quick—an agentic cognitive engine that turns 1 static lecture into 4 tailored learning modalities in under 30 seconds. First, a rapid 5-question diagnostic maps how your brain absorbs information. Then, our Amazon Bedrock pipeline instantly refracts the material: Spectrum 1 translates abstract theory into relatable dorm and dining hall analogies. Spectrum 2 renders structural ASCII concept maps and visual schemas. Spectrum 3 launches a Socratic Sparring Partner that quizzes you one edge-case at a time without spoiling answers. And Spectrum 4 builds a 4-slide micro-deck exposing the exact trap questions professors test on midterms."
SEGMENT 4: WHY IT WINS [1:20 - 1:45 25 SECONDS] · Presenter: Speaker 3 (Market Lead)
"Over 20 million college students face academic paralysis every semester. Generic tools like ChatGPT just dump 800-word walls of text that students glaze over. Private tutoring costs \$80 an hour, and professor office hours are only 2 hours a week. Prismatic is active, multi-modal, and adapts the syllabus to the student—democratizing elite private tutoring for pennies on Bedrock."
SEGMENT 5: THE CLOSE [1:45 - 2:00 15 SECONDS] · Presenter: Speaker 1 & Full Team (Unison)
"With more time, we'd add live Canvas and syllabus LMS integration , automatically syncing weekly exam dates and generating proactive 15-minute micro-sprints before every morning class. We don't just help students pass exams; we eliminate academic paralysis and unlock confidence. We are PRISMATIC—refracting complex knowledge into your native spectrum. Vote Prismatic for your room champion! Thank you!"

2. EMERGENCY QUICK PIVOTS

60-Second Flash Pitch (If Compressed): "Judges, 300 students in a lecture hall shouldn't be taught one way. When students freeze, it's not a lack of intelligence—it's a cognitive mismatch. We built Prismatic on Amazon Quick: a 30-second diagnostic maps your learning profile and refracts any syllabus topic into 4 active modalities: dorm analogies, visual flowcharts, Socratic active recall, and midterm exam trap decks. ChatGPT dumps text; private tutors cost \$80/hr. Prismatic gives every student an elite, adaptive tutor on Bedrock. With more time, we'd add Canvas LMS integration. We are Prismatic—vote Prismatic!"	30-Second Speed-Dating Hook: "White light has every color, but college lectures only teach in one shade. Prismatic is an agentic learning engine on Amazon Quick that turns any dense topic into 4 personalized spectrums—analogs, visual schematics, Socratic sparring, and exam trap cards. We democratize \$80/hour tutoring for every undergrad on campus!" Tech Fallback: Pivot to offline local web app (`web-app/index.html`) if Wi-Fi drops.
--	---

3. 10-PERSON TEAM CHOREOGRAPHY & STAGE POSITIONING

Role	Title	Responsibility During Presentation
#1	Founding Anchor	Delivers Segments 1 & 2 (Hook), leads team cheer, coordinates close.
#2	Product Architect	Delivers Segment 3 (App Overview), points to widgets on screen.
#3	Market Lead	Delivers Segment 4 (Why It Wins), fields business/market questions.
#4	Display Pilot	Holds laptop/cart showing running Amazon Quick UI or local Prismatic Web App.
#5	Cognitive Pedagogy	Answers Q&A; on learning styles, VARK theory, and cognitive friction.
#6	Cloud Architect	Answers Q&A; on Amazon Quick, Bedrock models, latency, and prompt engineering.
#7	Student Experience	Answers Q&A; on user persona, dorm life realities, and ADHD study habits.
#8	Campus Integration	Answers Q&A; on Canvas/Blackboard LMS API sync and university licensing.
#9	Official Room Voter	Designated team representative holding the official ballot for your room.
#10	Timekeeper / Co-Founder	Gives silent hand gestures at 1:00, 1:30, and 1:45 to keep pitch under 2 minutes.

4. ANTICIPATED SHARK TANK Q&A; DEFENSE

Q1: How does this differ from typing 'explain this to me' into ChatGPT? Defense: ChatGPT is passive text generation: it dumps 800 words that cause cognitive glaze. Prismatic is an agentic multi-widget pipeline. It starts with a 30-second diagnostic triage, and orchestrates 4 distinct modalities simultaneously—including a Socratic Sparring Partner that refuses to lecture and instead forces active recall by testing edge cases.
Q2: Why did you use Amazon Quick instead of coding a frontend from scratch? Defense: Velocity and multi-model orchestration. In a 75-minute sprint, coding full-stack auth, state management, and Bedrock API calls would introduce latency and bugs. Amazon Quick's Apps mode allowed our 10-person team to chain inputs into text generation, image generation, and a chatbot on a single screen without touching boilerplate.
Q3: How do you prevent students from using this to cheat? Defense: Prismatic is engineered for learning retention, not answer generation. The Socratic module bounds answers to 2 sentences and asks conceptual 'why' questions. It cannot write essays; it trains students to master the underlying mechanics so they can perform on in-person exams.
Q4: What is your revenue and distribution model? Defense: B2B university licensing (enterprise campus software) integrated into Canvas, plus a freemium B2C tier for students. Universities currently spend millions on retention programs; Prismatic directly increases course completion rates.

5. WHAT THE SHARKS LOOK FOR: FINAL AUDIT

✓ Creativity: Cognitive refraction metaphor (white light → 4 learning spectrums). ✓ Usefulness: Solves real 2026 undergraduate task paralysis and cram anxiety.	✓ Execution: Working multi-widget pipeline on Amazon Quick + local standalone web app. ✓ Teamwork: All 10 members have explicit on-stage roles. Timing: Exactly 1m 52s.
